SAVE THIS INSTRUCTION FOR USE

Intended purpose

The SpecialNeeds Feeder is intended to feed breast milk and other liquids of similar consistency to infants.

Indication for use

The SpecialNeeds Feeder is indicated for use for infants with:
 I A weak condition such as low muscle tone;
 I Neurologic, cardiac or respiratory disorders resulting in difficulties in coordination sucking, swallowing and breathing;
 I Oral-facial anomalies such as cleft lip/palate or strong tongue-tie;
 I Pierre Robin Syndrome or Down Syndrome.

Important safety information

For a patient/bruger/redelparet i EU og i landene med identiske, reguleringer regle (forordning 2017/745/EU om medicinsk udstyr) under brugen af dette udstyr eller som følge af dets brug er indtruffet en alvorlig hændelse, skal den inderberettes til producenten og/eller dennes autoriserede representant og til det nationale myndighed.

For the infants child safety and health - WARNING!

I Only use this product with adult supervision.

I Do not warm liquid in a microwave oven as this may cause uneven heating and could scald the infant.

I Use the product only for its intended purpose as described in the instructions for use.

I Use more than one infant without adequate reprocessing may present a health risk and could cause cross-contamination.

I Use Medela original accessories only.

I Inspect before each use. Throw away at the first signs of damage, mould or weakness.

I Never leave packaging and components unattended. Keep them out of reach of children.

Important safeguards

I Plastic bottles and component parts become brittle when frozen and may break when dropped.

I Components of the SpecialNeeds may become damaged if mishandled, e.g. dropped, over-tightened, or knocked over.

I Take appropriate care in handling bottles and components.

I Don't use the liquid if bottles or components become damaged.

Cleaning

Important

I Only drink drinking-quality water for cleaning.

I Reprocess all parts prior to first use (see below).

I Clean all parts immediately after use.

I The cleaning instructions below are general instructions. For country-specific regulations and guidelines, ask your Medela agent or visit our website (www.medela.com).

Before first use and once a day

I Cover all parts with water and boil for five minutes.

I Leave to dry on a clean cloth.

After each use

I Disassemble the feeder into its individual parts. Make sure to separate the yellow valve plate from the teat. Also separate the white membrane from the valve plate.

Note: You can re-use the milk that is left in the bottle. However, you must throw away the milk left in the teat. Therefore, hold the feeder above the sink. Carefully unscrew the lid and remove it together with the teat and valve plate, so as not to spill milk. Discard the leftover milk from the teat.

I Rinse all parts with cold water (approx. 20 °C). Clean all parts with plenty of warm, soapy water (approx. 30 °C). Use a commercially available cleaning-up liquid, preferably with anti-bacterial properties and colouring. Rinse all parts with cold water (approx. 20 °C).

I Alternatively, clean the product in the dishwasher. Place the parts on the top rack in the cutlery section. Use a commercially available dishwashing detergent.

I Leave to dry on a clean cloth.

Storage

Put the clean parts in a clean storage bag or a clean environment. It is important that all residual moisture dries. Do not store parts in an airtight container/bag.

How to use

I It is recommended that the mother performs her first feeding with the SpecialNeeds Feeder under the supervision of a professional/trained staff.

I Always check the temperature of the liquid before feeding.

Assembling the feeder

I Hold the valve plate with the high rim facing upwards. Place the membrane onto the valve plate, inside the rim. Push the membrane's knob completely through the central hole of the valve plate.

I Fill the bottle with the required amount of liquid.

I Place the assembled valve with the high rim upwards onto the bottle opening.

I Place the teat on the valve plate, such that the rim is inside the teat.

I Slide the lid over the teat. Screw all parts together with the lid.

Filling the teat

I Hold the feeder upright. Squeeze some air out of the teat.

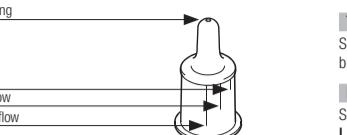

I Keep squeezing while turning the feeder upside down.

I Now release the teat. Some liquid will enter.

I Repeat the above steps until the teat is full.

Controlling the milk flow

silicone opening

The SpecialNeeds Feeder offers the opportunity to adapt the liquid flow to your infant's needs. Use the lines on the teat to set the liquid flow. The shortest line corresponds with zero flow, the middle line with a medium flow, and the largest line for maximum flow.

To select a flow rate, point the corresponding line on the teat towards the silicone opening.

Viktig sikkerhetsinformasjon

Før patient/bruger/redelparet i EU og i landene med identiske, reguleringer regle (forordning 2017/745/EU om medicinsk udstyr) under brugen af dette udstyr eller som følge af dets brug er indtruffet en alvorlig hændelse, skal den inderberettes til producenten og/eller dennes autoriserede representant og til det nationale myndighed.

For barnets sikkerhet og helse - ADVARSEL!

I Only use this product with adult supervision.

I Do not warm liquid in a microwave oven as this may cause uneven heating and could scald the infant.

I Use the product only for its intended purpose as described in the instructions for use.

I Use more than one infant without adequate reprocessing may present a health risk and could cause cross-contamination.

Полностью прочтите инструкцию перед началом использования.
СОХРАНИТЕ ДАННУЮ ИНСТРУКЦИЮ ПО ПРИМЕНЕНИЮ

Назначение

Поливник SpecialNeeds предназначен для кормления детей грудным молоком и другими жидкостями сходной консистенции.

Показания к применению

Поливник SpecialNeeds предназначен для кормления детей со следующими проблемами:

- слабый сосательный рефлекс;
- низкий мышечный тонус;
- неврологические, сердечные и респираторные нарушения, затрудняющие координацию сосания груди, глотания и дыхания;
- членочно-лицевые аномалии, такие как укороченная уздечка, расщепленная верхняя губа или неба;
- синдром Робина или синдром Дауна.

Информация о технике безопасности

Для пациента/заботы/врача/третьего лица в Европейском союзе и в странах с аналогичными нормативами (Регламент о медицинских изделиях 2017/745/EU), если во время или в результате использования данного изделия произошло серьезное происшествие, сообщите об этом производителю и (или) его уполномоченному представителю, а также в соответствующие национальные органы.

Для безопасности и здоровья детей: ПРЕДУПРЕЖДЕНИЕ!

Для установки данного изделия только под

контроль врача.

- Необходима жесткость в гибкостной линии, чтобы это может произойти с ее изнашиванием и нарушением и возникновением опасностей у ребенка.

Использование устройства только по назначению,

исписанному в данной инструкции.

Использование нескольких деталей без соответствующей

органической обработки может создавать риск для здоровья и введения инфекций в организм.

Использование только органических аксессуаров Medela.

Перед каждым применением целиком санитаризируйте изделие.

Внимание!

Поскольку после каждого сосательного движения цепь закрывается, ребенок не захлебнется.

Внимание!

Можно плавно изменять скорость подачи жидкости, выберите необходимую скорость потока (от нулевой до максимальной) и установите сосок в соответствующее положение между горловиной и днищем линий.

Лангхук пакетированы

Пакеты

пакета

■ Для очистки используйте только питьевую воду.

■ Перед первым использованием обработайте все детали (см. ниже).

■ Промойте все детали сразу после использования.

■ Далее представлены общие инструкции по обработке. Инструкции и правила для отдельных стран можно узнать у представителей компании Medela или на нашем веб-сайте (www.medela.com).

Перед первым использованием и ежедневно

■ Полностью залейте детали водой и прокипятите в течение пяти минут.

■ Поместите их на частичное полотенце для высыхания.

После каждого использования

■ Разберите поливник на части. Отделите желтую пластину клапана от соска. Также отделите белую мембрану от пластинки клапана.

Внимание!

Осташевшиеся в бутылочке молоко можно повторно использовать для кормления, если оно было правильно подготовлено, освобождено от воздуха, определено температурой и хранено в чистом месте. Очень важно, чтобы детали полностью высыхали. Не храните детали в герметичном контейнере или пакете.

Порядок действий

■ Матерям рекомендуется проводить первые кормления с помощью поливника SpecialNeeds под наблюдением специалиста/медицинского персонала.

■ Всегда проверяйте температуру жидкости перед кормлением ребенка.

Сборка поливника

Крышка

Соска

мембрана

Пластиковая клапана (с высоким краем верхней части)

Бутылочка для молока

■ Держите пластину клапана высоким краем вверх. Разместите белую мембрану на пластине клапана внутри края. Полностью протяните выступающую часть мембранны через центральное отверстие в пластине клапана.

■ Наденьте на бутылочку необходимым количеством жидкости.

■ Установите соску на пластину клапана так, чтобы край оказался внутри соски.

■ Наденьте на соску крышку. Закройте крышку, соединив все детали.

Наполнение соски

■ Держите поливник вертикально. Сожмите, чтобы выпустить из соски воздух.

■ Продолжая сжимать, переверните поливник вверх дном.

■ Отпустите соску. В ее начнет поступать жидкость.

■ Повторите эти действия, пока соска не наполнится.

Монтаж соски

■ Отпустите
